

IT Solutions for CAE

For our subsidiary in **Jaipur, India**, we are looking for a

Senior Backend Developer

m/f/d

SCALE is a key development partner for leading automotive OEMs worldwide in simulation data management. We stand for innovation, creativity, and premium-quality software solutions. To strengthen our team in Jaipur, we are looking for a Senior Backend Developer (m/f/d) in the fast-growing field of process integration and simulation data management.

Why Join US?

SCALE Germany has expanded to Jaipur, India, to build a strong development hub and tap into the region's growing IT ecosystem. Our team in India works closely with colleagues in Germany on the SCALE.sdm product suite, developing cutting-edge and scalable software solutions for global customers.

As a Senior Backend Developer, you will be part of the core tech team in Jaipur, collaborating with developers in Germany. You will design, implement, and deliver reliable backend features that drive the success of our product portfolio.

SCALE India's software development or tech team would function as an extension of the software development team at various locations in Germany, assisting in the development of the SCALE.sdm product portfolio and thus contributing to the success of brand SCALE.

Your Responsibilities

- Design and implement complex features into existing software architecture
- Design and implement complex features in existing software architectures, optimize code for efficiency and usability
- Work according to agile development processes
- Translate customer requirements into reusable solutions, participate in code reviews, and apply modern development practices
- Collaborate seamlessly within a multisite, multicultural, and multinational team
- Assist in troubleshooting of development and production-related technical issues

Your Profile

- At least 5 years of professional experience in software application development
- Minimum 3 years of hands-on experience with Python, Django, and REST APIs
- Strong knowledge of data structures, algorithms, databases, and SQL
- Experience with Angular/JavaScript is a plus
- Familiar with GitLab and CI/CD pipelines
- Passionate about technology and eager to stay up to date with current trends
- Willingness to work regularly on-site in Dresden
- Strong team player with a proactive mindset

Education

- Bachelor's or Master's degree in Computer Science or a related field
- Master's degree preferred

What We Offer

- Unique opportunity to develop your career in a start-up environment and a rapidly growing international team
- Flat hierarchy, shorter decision paths, and an accountable working environment
- Competitive compensation inclusive of pay and bonus incentives
- Regular possibilities for further development
- Group medicaid policy
- Personal accident policy
- Flexible working time
